Page 1 - Our Story

Established in 1999 as a joint venture between local holding company, L & G Tools and an Italian manufacturer. The foreign company exited in 2008 and the company became locally owned by major shareholder L & G Tools and minor shareholders in management.

In October 2013, another branch was opened in Gauteng to create ease of access to our customer base and provide higher levels of efficiency. We were critically aware that our proximity to our main market represented challenges to the way our service capabilities were viewed by our customers.

Premises in Meadowdale were carefully chosen and secured to be conveniently accessible to customers needing emergency and unplanned access to spare parts and compressed air equipment when needed the most.

In August 2023, we significantly bolstered our market position through the acquisition of Electro Air Compressors in Cape Town. This move marked a key milestone in the company's growth trajectory, expanding its technical capacity and consolidating our presence in strategic industrial hubs. The integration of Electro Air's experienced workforce and customer portfolio has further strengthened our ability to provide seamless support and comprehensive solutions.

As of 1st April 2025, Airstream Compressors has been acquired through a management buyout. The ownership of Airstream Compressors has transitioned from L & G Tools Holding Company to Airstream Group, the new Holding Company of Airstream Compressors, and the directors are Lester Davis and Marius Janse van Rensburg.

A word from Lester Davis: "I believe this is a significant and positive step forward, one that reflects our shared belief in the strength of the business and the incredible potential we see for the future. We are fully invested in building on the foundation we've all helped create, with a strong focus on sustainable growth, innovation and opportunities. This transition marks a new chapter - one that we're excited to begin with all our staff, existing customers and new customers"

As a Director of Airstream Group, Marius Janse van Rensburg plays a pivotal role in the day-to-day operations of Airstream Compressors. Having joined as a technician in 2014 and progressed to Technical Manager and later Operations Manager, Marius's journey exemplifies dedication and growth within the company. He is the central point for quotations and purchase approvals and a consistent source of motivation for the team.

His technical acumen ensures that all new installations are precisely specified and perfectly executed. Marius firmly believes in the power of people, stating, "We achieve greatness not by standing alone, but by empowering our team, fostering trust and inspiring everyone to aim higher. There's no limit to what we can accomplish together."

Vision

To become rated as the "Best in Industry" in Southern Africa by consistently providing quality equipment and services in a manner that exceeds customer expectations.

Mission

We source, distribute and maintain quality equipment by providing solutions whereby our customers can maximize their profitability through the best available "Quality to Price" ratio and exceptional attention to customer service.

Quality Policy

To aggressively develop and market our products to domestic and foreign clients, achieving highest levels of satisfaction through:

- Consistently meeting and exceeding customer requirements.
- Timeous delivery.
- Concentrating our resources on designing and building quality into our products and services.
- Continuously improving process controls in areas of our business.
- Encouraging our suppliers to enhance input quality.
- Attracting, retaining and developing motivated quality performers.
- Compliance to the legal and regulatory requirements applicable to our products.

Integrity:

Accountability to customers, employees and shareholders

Community:

Non-discrimination and equal opportunity.
Fairness and honesty in stakeholder interaction.
Respect for human dignity, human rights, social justice and environment.

Fulfillment:

Job satisfaction, pleasant working environment.
Appropriate reward system and distribution of wealth.
Entrepreneurship and innovation.

Health:

The company cares about our employees' health and safety.
Health promotes happiness and productivity.

Work-life balance:

Service excellence, creating an exceptional place in which to work and do business.
Knowing how to distinguish and prioritize between work and personal time.

Education:

Empowerment of our people through providing necessary resources through training.
Knowledge is powerful if directed wisely.

Services, overhaul, repairs, installations, pressure testing

Screw compressor services

Piston compressor services

Dryer services

Overhauls on compressors

Repairs to compressors

Repairs on dryer

Installations

We offer full installation of your compressed air equipment, including piping work but excluding electrical work

Pressure Testing

We provide pressure testing services under the supervision of an AIA (Authorized Inspection Authority)

Technical Support

We have a team of highly trained personnel, skilled in all aspects of the business process to ensure efficiency and longevity of our customers compressed air equipment, offering 24-hour services with hire screw compressors ranging from 7.5kw - 75kw in size in 8 bar to 12.5 bar pressure ranges with a combined total of 837kw between our Durban, Gauteng and Cape Town branches.

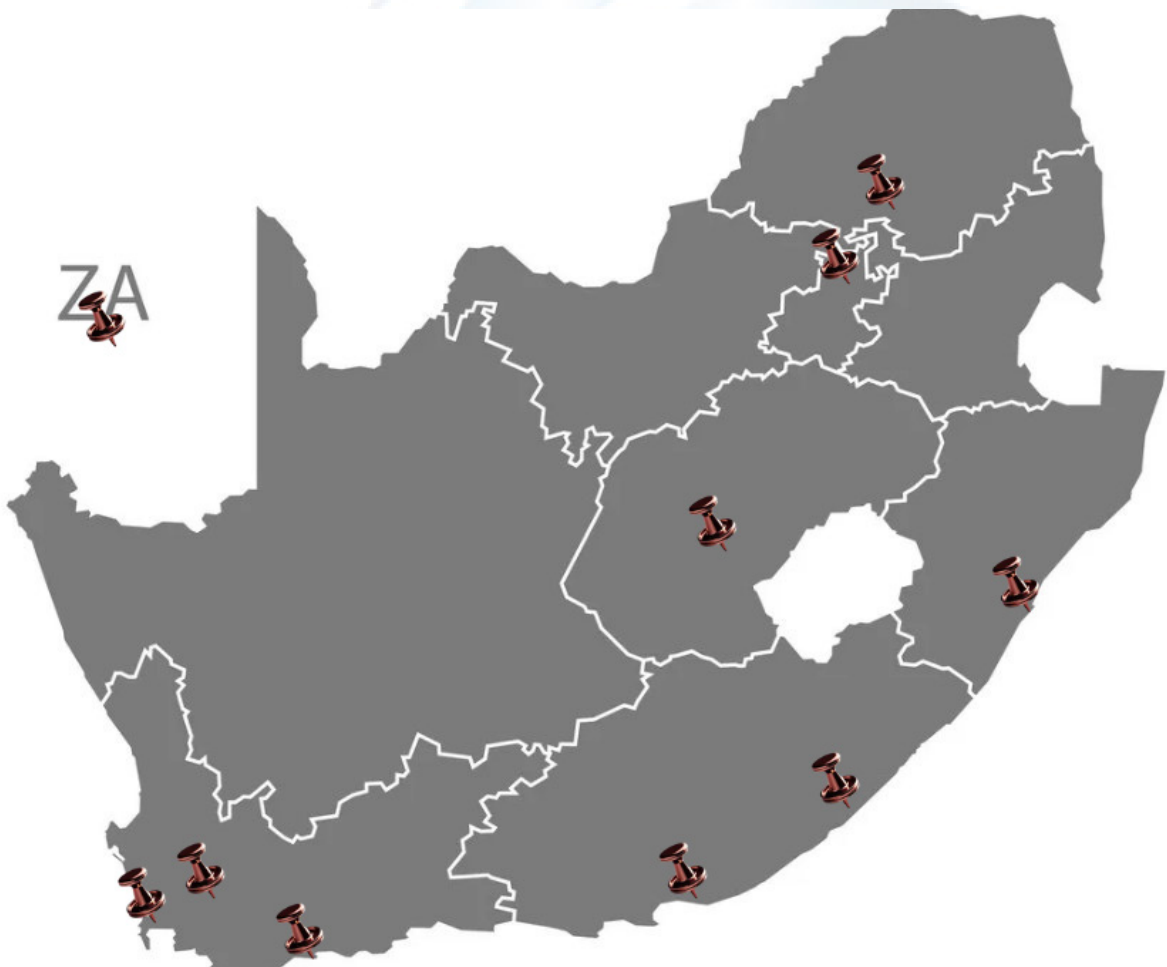

Financial Support

With being in the compressed air industry for over 25 years, we have built up partnerships with reputable professional companies over the years and can now also offer rent to own options/finance options. Terms and Conditions apply.

Distribution

We have distribution centers across South Africa and across border:

- Bloemfontein - Annco Agencies
- East London - Industrial Welding Supplies
- Port Elizabeth - Dean Le Roux for Airstream Compressors
- Nelspruit - Lowveld Garage Equipment
 - Paarl - Winelands Compressors
 - Also in Namibia - Cymot
 - Swaziland - Kitwe Hydraulics

Compressors

Low Pressure Permanent Magnet Compressors

Permanent Magnet Compressors

Oil Free Compressors

Fixed Speed Compressors

All In One Compressors

220 Volt Compressors

Dryers

Refrigerated Dryers

Blower Purge Dryers

Adsorption Dryers

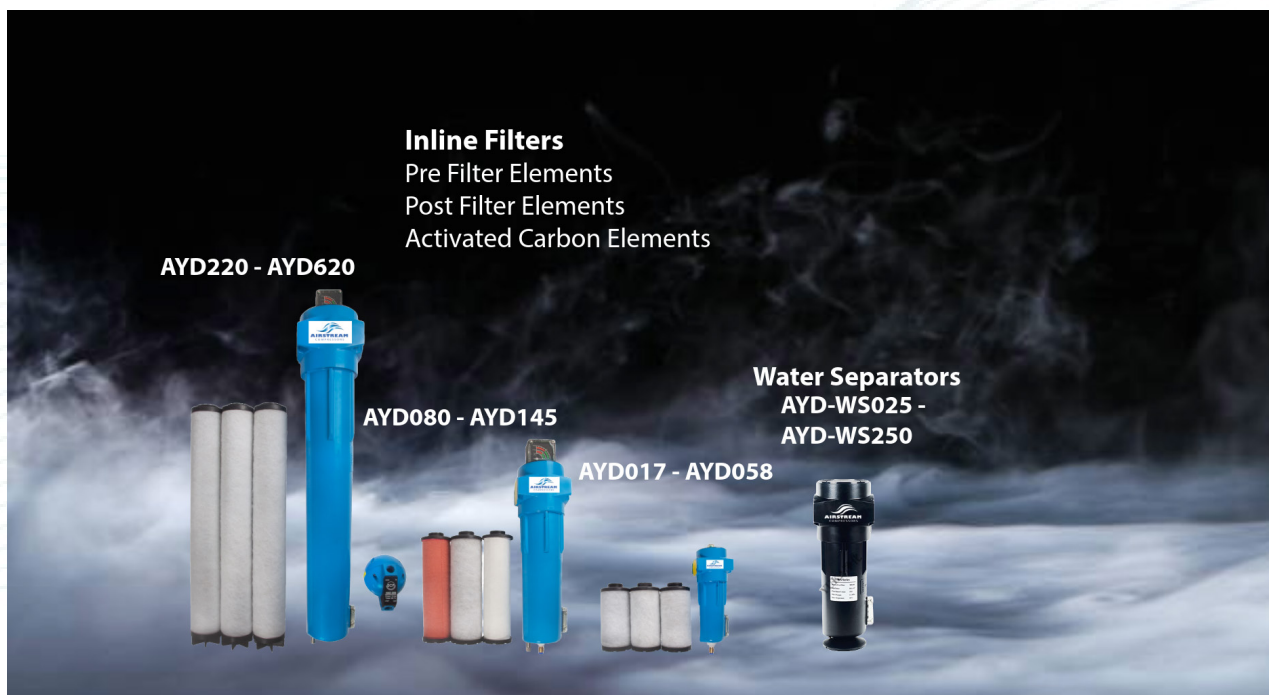

Condensate Treatment and Separators

Pressure Vessels

Filtration

How to reach us

Durban - Head Office

3 Circuit Road, Westmead
031 700 6501 - 065 861 6957

Gauteng Branch

Unit 10 Eden Crossing, Dick Kemp Street, Meadowdale
011 392 1965 - 065 985 9198

Cape Town Branch

Unit 15 Dundas Park, 23 Junction Road, Parow Industrial, Cape Town
021 939 6046 - 065 877 2189

Port Elizabeth - Gqeberha

Page 11- Our customers

We have partnered with more than 3000 companies since 1999. Here is a list of some of our customers:

Irvin & Johnson

Truda

Mother Son Group

VW

Hyundai

DST Group

Clutch and Brake Specialists

Hollyberry Group

Idea Fruit Group

Thermo Pac

BMW

Mercedes

Chery

Venture Global

Afro-Zonke Group

AfriSam South Africa

Efekto

Alumicor

Art Solar

Aqua Transport

ARM Ferrous

Audi

Auto Magic

SMG Group

Auto And General

Aveng Group

Umgeni Water

Bigfoot Express

Bio-Cap

Blastrite

Blow Twin

Bluff Tyres

BMI Group

Builders Group

NPC Cement

Conlog

Mauser Packaging

Life Healthcare Group

Cycle Lab

FFS

Fast Form Group

Russelstone Group

NMI Group

Super Group Holdings

GUD

IDS Protect

General Manufacturing - Power pneumatic tools, cleaning equipment, automate application lines

Pharmaceuticals - Manufacturing and packaging processes of pharmaceuticals

Automotive Industry - Manufacturing processes of vehicles, painting of cars and inflating tyres.

Laser cutting - Blowing away of heat, smoke and debris produced during laser cutting.

Construction - Powering of tools like jack hammers, compactors, sandblasters.

Mining - Drilling and extracting processes.

Spraying - Power spraying paint equipment.

Oil and gas industry - Exploration, drilling and refining processes.

Sandblasting - Clean and prepare surfaces for painting or sealing.

Glass containers - Moulding and cooling processes.

Plastic blow moulding - Heating, forming and inflating plastic materials to form containers.

Rubber moulding - Shaping uncured rubber into desired forms using heat and pressure.

Food Packaging - Packaging processes and injection moulding.

Water Treatment - Aeration tanks to break down waste.

Hospitals - Breathing air, powering surgical tools, ventilators.

3D Printing - Managing fumes and maintaining a stable printing environment.

Electronics Manufacturing - Providing clean, dry and controlled air across various processes, ensuring product quality and preventing defects.

Food Manufacturing - Powering automation, conveying ingredients, cleaning equipment and packaging.

Fruit and Veg - Washing and sorting to packaging and storage.

Textile Industry - Powering pneumatic systems, aiding in tasks like yarn tension control, fabric handling and actuating various machine components.

Dairy Production - Used in milking systems, milk processing and packaging, ensuring efficient and hygienic dairy production.

Printing machines - Drying printed materials, paper feed operations, de-inking paper.
